

Sales Data Processing & Business Insights Report

Retail Organisation | Dataset: 50 transactions | Jan – Apr 2024

Total Revenue R903,500	Top Region North	Top Product Phone	Top Salesperson John
----------------------------------	----------------------------	-----------------------------	--------------------------------

1. Which Region Performed Best?

The North region earned the most money at R260,500, which is 29.9% of the total revenue. North came in a close second at R225,500 (21.8%). The East region earned the least — only R126,000 .

Region	Revenue	% Total
North	R260,500	29.9%
South	R225,000	27.8%
West	R148,000	24.9%
East	R126,000	16.4%

2. Which Products Made the Most Money?

Phone was the top product by far, bringing in R440,000 — almost half (48.7%) of all revenue by itself. Electronics products (Phone, Laptop, Tablet) together made up 85.2% of all revenue. Furniture (Desk and Chair) made up only 14.8%.

Product	Revenue	% of Total	Notes
Phone	R440,000	48.7%	Electronics — single biggest earner
Laptop	R180,000	19.9%	Electronics
Tablet	R150,000	16.6%	Electronics
Desk	R75,000	8.3%	Furniture
Chair	R58,500	6.5%	Furniture — lowest performer

3. How Did Sales Change Over Time?

Revenue grew steadily from January to March, then stayed the same in April. **January: R112,000 → February: R200,500 → March: R223,500 → April: R223,500**. This is a 69.7% increase from the start to the end of the period. The fact that March and April are identical suggests sales may have reached their current capacity ceiling.

4. Who Were the Top Salespeople?

John earned the most at R260,500 (29.9%), with Mary close behind at R204,000 (26.8%). Together they brought in 56.7% of all revenue. David was the lowest-performing named salesperson at R126,000 (16.4%). Two transactions worth R21,000 had no salesperson name recorded, which needs to be fixed.

5. Business Recommendations

- **Fix the East region:** East earned 45.2% less than North. Management should send more resources or a senior salesperson to this area to grow sales.
- **Do not rely too heavily on Phone:** Phone makes up 48.7% of all revenue. If Phone sales drop, the business loses almost half its income. Push Laptop and Tablet sales to create a more even spread.
- **Support Sarah and fix missing data:** David's average sale (R14,800) is much lower than the top reps. A coaching programme could help. Also, the two transactions with no salesperson name must be fixed — every sale should be recorded under the correct person.

Data quality note: The raw file had 52 rows. 2 duplicate records were removed, leaving 50 clean transactions. 2 missing salesperson names were labelled 'Unknown'. 2 missing quantity values were filled in using the median quantity for that product.
